

# Roadmap

## Router Network Development Timeline

2020 Q3

### (AMM Research)

Analysis of existing AMM's  
Initial Prototyping

2020 Q4

### (AMM Optimisation)

Key hires  
Build and Launch Gasless AMM on Matic Chain (DFYN)

2020 Q4

### (Fundraising)

Token Launch  
Private Sale

2021 Q1

### (Pre-Launch)

Cross-chain farming pilot  
Exchange listing: Uniswap & Bitmax

2021 Q1

### (Product Ideation)

Stress analysis of PoS based bridging infrastructure  
User Interface revamp  
Publish Lite Paper

2021 Q2

### (Core product development)

Launch prototype of plug-and-play bridge between two EVM based chains  
Open-source the Bridge repositories on Github  
Launch Router Bridge testnet  
Design cross-chain aggregator

2021 Q2

### (Aggregator Testnet)

Launch cross-chain aggregator on Polygon testnet  
Expand aggregator to other chain testnets  
Develop and integrate Oracle-based adapters to optimise for cross-chain transfers

2021 Q3

### (Polygon Mainnet Launch)

Deploy aggregator on Polygon Network  
Integration with public bridges for stake withdrawals

2021 Q3

### (Crosschain DAO)

Develop infra to support cross-chain governance

2021 Q3

### (Dedicated Chain)

Build and deploy a dedicated chain to host aggregator infrastructure
